

Amalia Sörlien

EDUCATION

Design and Product Development

Linköping University | 2013- 2018
M.Sc in Engineering

The education is as much about design as solving problems and project management. I have both technical and design knowledge throughout the whole product development process, from idea to finished product.

Industrial Design Engineering

San Diego State University | 2016

I started my masters degree with one semester at San Diego State University.

COMPETENCES

Visualization

Swedish

English

Soft skills

Ambitious

Fast learner

Team player

Curious

Keen eye for details

PROFILE

I see myself as a designer and a creative engineer. As a designer, I have a profound interest in human-centred design and user experiences. With a background as an engineer I enjoy problem-solving and to find smart and feasible solutions. I like situations that demand problem solving and creativity.

WORK EXPERIENCE

Human Machine Interface Engineer

Volvo Group Trucks Technology | 2018 - present

The daily work includes collaboration with different stakeholders, such as UX-designers and developers, to develop and maintain the in-house Android based entertainment system. I deliver HMI specifications to my team and is responsible for HMI requirements. In this role, it is important to effectively communicate with stakeholders and coordinate the flow of information in order to work successfully.

Technology Operator

Verisure | 2017

While studying I worked part time as a Technology Operator at the market-leading home security company called Verisure. The job as an operator was all about helping customers and thereby demanded fast problem solving. Main duties in the position involved incoming call and first line technology support for the field, staff and customers. Even though the work was conducted individually, it was important to work as a team to reach quality objectives.

ACHIEVEMENTS

Advanced Engineering Project

HMI asset in a project for Volvo GTT | 2019

First Aid Helper

Volvo GTT | 2019

SAFe training

Participated in a two-day certified SAFe agile training | 2019

Driver's license B

2012
